OAK / LEATHER

The total estimated climate emission is no greater than:

80 kg CO₂-eq*

Potential impact of missing data:

Best case: 47 kg CO₂-eq

Worst case: 80 kg CO₂-eq

This climate emission is the approximate equivalent of:

Main emission sources pr. material group:

AC2 CHAIR

DESIGN: byKATO

OAK / LEATHER

This screening result reflects an emission estimated to be no greater than 80 kilos of CO₂e. The result is obtained through a self-assessment using the MÅLBAR software (v. 2.9612). The screening has not been verified by Målbar or third party. The results in this report are not intended for communication towards the private consumer (B2C) but only for the professional market (B2B). The calculations are performed on 28.10.2024 and valid in 1 year from this date.

STANDARD FOR CALCULATION

This climate footprint report is calculated according to EU's rules for Product Environmental Footprint (PEF). When data was not available from the brand owner, conservative estimates has been applied. All phases of the product lifecycle are included in the calculation. For the phases after factory gate; Use Phase and Disposal, conservative estimates build from the PEF rules are applied. Specifically, the disposal is calculated based on an EU average.

Målbar only reports on Climate Impact.

THE DATA SOURCES BEHIND THESE CALCULATIONS ARE:

EcoInvent 3.8 and EF 3.0 and 3.1 PEF data as well as PEF compliant LCA data (read more here: www.maalbar.dk/transparency/).

METHOD OF DATA APPLICATION

This report is generated by using MÅLBAR's Climate Screening Tool with the brand owner performing a self-assessment, with no external verification.

RESPONSIBILITY OF DATA

It is the sole responsibility of the Brand Owner concerning all Input data (including: material and packaging weights and dimensions, origins of production and material, and transport, warehouse and retail information).
