Alumi

Design Nina Jobs

Alumi is an understated, versatile series of sound absorbing screens by Nina Jobs. Choose between a smooth felt surface or three different felt patterns. Note! Stop/Block/Dot relief pattern is compatible with following fabrics: Felt plain, Soundfelt VF, Snow white, Blazer, Synergy and Synergy 170.

Materials

Screen with an aluminium frame in white or anodised version. The screen is filled with a sound absorbing material. Upholstered with felt or fabric on both sides. Legs to be purchased separately.

Alumi Combi

Design Nina Jobs

The screens, which function both as sound absorbers and writing boards, are mounted on wheels for easy portability. The versatile writing boards have the same understated look as the other sound absorbing screens in the Alumi series, allowing them to be combined in harmonious unity.

Materials

Alumi Combi sound absorber and writing board combined in one product. One side is upholstered with a sound absorbing felt sheet, whilst the upper section of the other side features a writing board in e3 enamel. The writing area is also available in glass. **On Alumi Combi Light** one side consists completely of an E3 enamel surface, the other side is completely covered in fabric. Legs to be purchased separately.
