Borde / Tables

I den arbejdsrelaterede dagligdag stiger kravet til fleksibilitet. Til dette skabtes det mobile Contact bord, der er forsynet med hjul og stables horisontalt, når bordpladen - uden brug af løft eller kræfter - bliver klappet op til optimal udnyttelse af rummets funktioner. Til stationært brug leveres bordet også med glide.

In the work-related every day life the demand for flexibility grows. For this purpose the mobile Contact table was created, fitted with castors and stackable horizontally when the table top is raised – without lifting or using any strength, obtaining an optimal use of the functions of the room. For stationary use the table is also available with glides.
