

# Scoop Conference

**+Halle®**

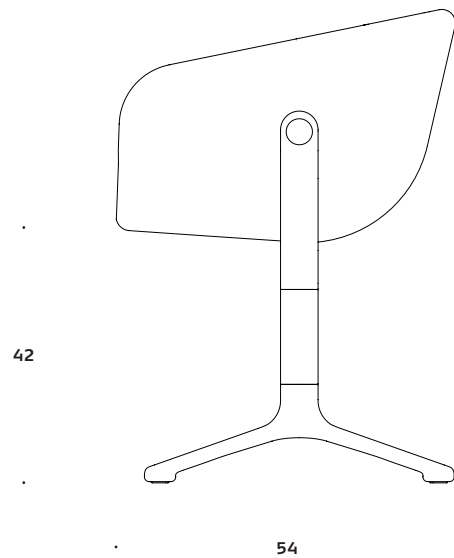

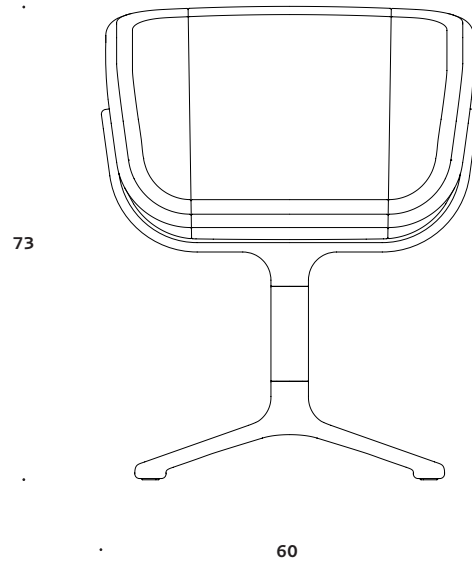

## Scoop Conference

Scoop merges craft and technology. The innovative gyroscope like suspension system enables the user to tilt the chair forward and backwards, which conveys a feeling of being carried - a free suspended feel. The Y-shaped aluminum beam creates a visual and functional overlap between seat and base. The technical edge increases comfort and maintains a clear and simple Scandinavian appearance. Available in a conference and lounge chair edition. Family also comprises a lounge table in two differing heights.

### Designed by KiBiSi

KiBiSi is one of Scandinavia's most influential studios. The three founding partners Lars Larsen, Bjarke Ingels, and Jens Martin Skibsted contribute with various competences acquired from within different industries and makes KiBiSi a design studio based on production know-how, big ideas, and idea driven innovation.

Dimensions defined in centimeters
