ENVIRONMENTAL
PROFILE

DESIGNED BY PEARSON LLOYD 2012

SixE® LEARN

SixE is truly refined engineering by the successful design duo Pearson Lloyd - a chair that is durable, elegant and environmentally friendly; one that also offers efficient stackability and a design that is fitting for every setting. Like all HOWE products, SixE responds to the most current thinking, research, and standards where safety and the environment are concerned. SixE uses the most carefully selected materials and the chair design is an example of the refined engineering used to focus on comfort and support. SixE is designed to be the most efficient, sturdy, and long-lasting solution to the ubiquitous stacking shell chair.

FEATURES

Learn more about HOWE and our Moving Sustainability initiatives here:

<https://www.howe.com/moving-sustainability>

SUPPLIERS

HOWE works closely together with our suppliers to continuously reduce our products' impact on the environment. HOWE is thus setting high environmental demands for both HOWE and our suppliers to comply with.

RESIN IDENTIFICATION

The plastic components of SixE are marked with ASTM (ISO 11469) resin identification codes whenever possible in order to facilitate correct sorting of components for recycling.

DESIGN FOR DISASSEMBLY

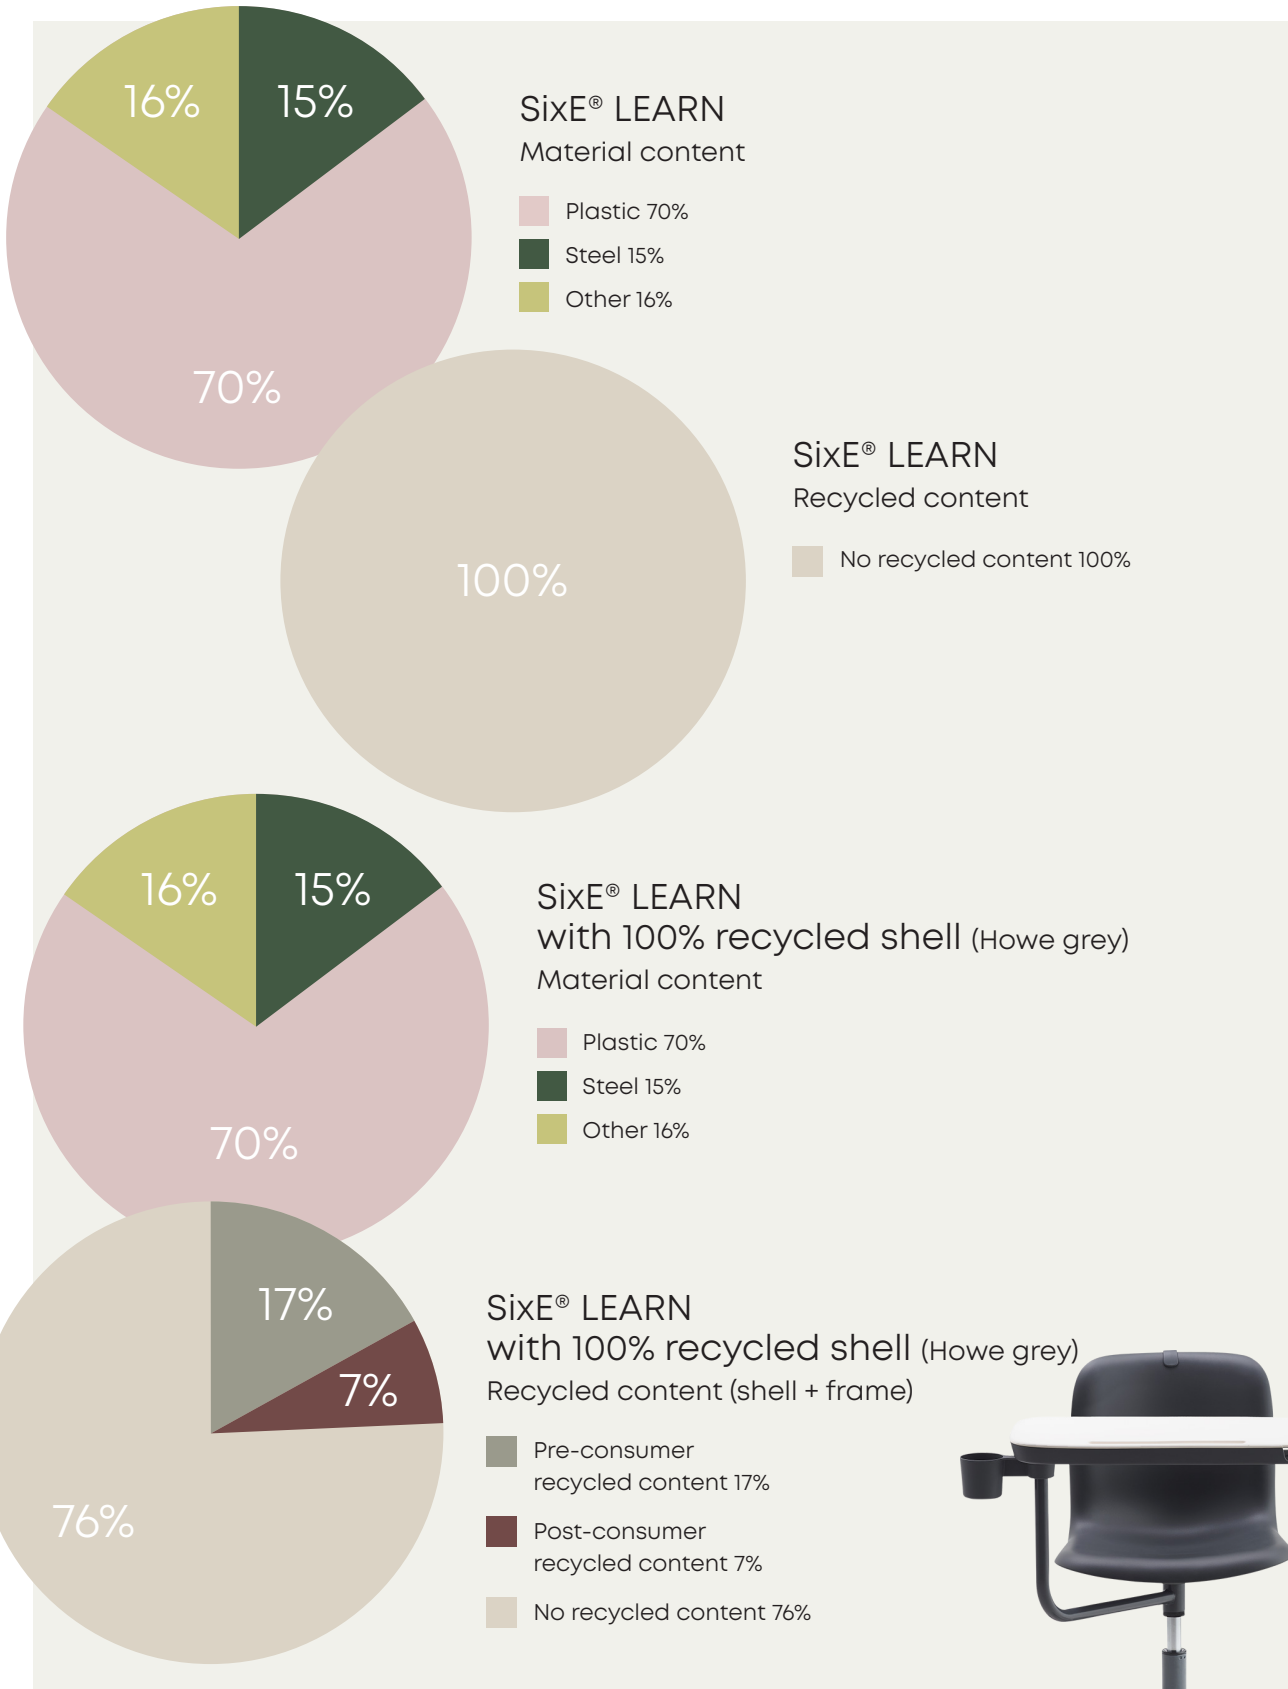

It is a fact that products assembled with complex assemblies or requiring multiple tools are not likely to be repaired or recycled. Therefore, SixE is cleverly designed to be disassembled by the use of a screwdriver only.

DID YOU KNOW THAT...

- SixE Learn is 45% recyclable at the end of the product's life?
- SixE stands for six E's – one of them being Environmental?
- SixE Learn contains no PVC?
- SixE Learn is part of our TakeBack Option and can be returned to HOWE after its useful life?

- SixE Learn is a combination of timeless and durable design?
- SixE Learn is cost efficient and replacements of components are easily manageable?
- SixE Learn is designed for easy disassembly?
- SixE Learn has a 5-year warranty?

Subject to ongoing changes and adjustments.
